A PEER-REVIEWED BIMONTHLY JOURNAL

# TURKISH JOURNAL OF UROLOGY

## AIMS AND SCOPE

Turkish Journal of Urology (Turk J Urol) is the scientific, peer reviewed, open access publication of the Turkish Association of Urology. The journal is a bimonthly publication, published on January, March, May, July, September and November.

The aim of the Turkish Journal of Urology is to contribute to the literature by publishing scientifically high-quality research articles as well as reviews, editorials, letters to the editor and case reports.

The journal's target audience includes, urology specialists, medical specialty fellows and other specialists and practitioners who are interested in the field of urology.

The editorial and publication processes of the journal are shaped in accordance with the guidelines of the International Committee of Medical Journal Editors (ICMJE), World Association of Medical Editors (WAME), Council of Science Editors (CSE), Committee on Publication Ethics (COPE), European Association of Science Editors (EASE), and National Information Standards Organization (NISO). The journal is in conformity with the Principles of Transparency and Best Practice in Scholarly Publishing (doaj.org/bestpractice).

Turkish Journal of Urology is currently indexed/abstracted by-PubMed Central, Web of Science-Emerging Sources Citation Index, TUBITAK ULAKBIM TR Index, Scopus, HINARI, EBSCO, CINAHL, GALE and ProQuest.

Processing and publication are free of charge with the journal. No fees are requested from the authors at any point throughout the evaluation and publication process. All manuscripts must be submitted via the online submission system, which is available at [www.turkishjournalofurology.com](http://www.turkishjournalofurology.com). The journal guidelines, technical information, and the required forms are available on the journal's web page.

All expenses of the journal are covered by the Turkish Association of Urology. Potential advertisers should contact the Editorial Office. Advertisement images are published only upon the Editor-in-Chief's approval.

Statements or opinions expressed in the manuscripts published in the journal reflect the views of the author(s) and not the opinions of the Turkish Association of Urology, editors, editorial board, and/or publisher; the editors, editorial board, and publisher disclaim any responsibility or liability for such materials.

All published content is available online, free of charge at [www.turkishjournalofurology.com](http://www.turkishjournalofurology.com). Printed copies of the journal are distributed to the members of the Turkish Association of Urology, free of charge.

Turkish Association of Urology holds the international copyright of all the content published in the journal.

The journal is printed on an acid-free paper

# TURKISH JOURNAL OF UROLOGY

## INFORMATION TO AUTHORS

Turkish Journal of Urology (Turk J Urol) is the scientific, peer reviewed, open access publication of the Turkish Association of Urology. The journal is a bimonthly publication, published on January, March, May, July, September and November.

The aim of the Turkish Journal of Urology is to contribute to the literature by publishing scientifically high-quality research articles as well as reviews, editorials, letters to the editor and case reports.

The journal's target audience includes, urology specialists, medical specialty fellows and other specialists and practitioners who are interested in the field of urology.

The editorial and publication processes of the journal are shaped in accordance with the guidelines of the International Council of Medical Journal Editors (ICMJE), the World Association of Medical Editors (WAME), the Council of Science Editors (CSE), the Committee on Publication Ethics (COPE), the European Association of Science Editors (EASE), and National Information Standards Organization (NISO). The journal conforms to the Principles of Transparency and Best Practice in Scholarly Publishing (doaj.org/bestpractice).

Originality, high scientific quality, and citation potential are the most important criteria for a manuscript to be accepted for publication. Manuscripts submitted for evaluation should not have been previously presented or already published in an electronic or printed medium. The journal should be informed of manuscripts that have been submitted to another journal for evaluation and rejected for publication. The submission of previous reviewer reports will expedite the evaluation process. Manuscripts that have been presented in a meeting should be submitted with detailed information on the organization, including the name, date, and location of the organization.

Manuscripts submitted to the Turkish Journal of Urology will go through a double-blind peer-review process. Each submission will be reviewed by at least two external, independent peer reviewers who are experts in their fields in order to ensure an unbiased evaluation process. The editorial board will invite an external and independent editor to manage the evaluation processes of manuscripts submitted by editors or by the editorial board members of the journal. The Editor in Chief is the final authority in the decision-making process for all submissions.

An approval of research protocols by the Ethics Committee in accordance with international agreements (World Medical Association Declaration of Helsinki "Ethical Principles for Medical Research Involving Human Subjects," amended in October 2013, [www.wma.net](http://www.wma.net)) is required for experimental, clinical, and drug studies and for some case reports. If required, ethics committee reports or an equivalent official document will be requested from the authors. For manuscripts concerning experimental research on humans, a statement should be included that shows that written informed consent of patients and volunteers was obtained following a detailed explanation of the procedures that they may undergo. For studies carried out on animals, the measures taken to prevent pain and suffering of the animals should be stated clearly. Information on patient consent, the name of the ethics committee, and the ethics committee approval number should also be stated in the Material and methods section of the manuscript. It is the authors' responsibility to carefully protect the patients' anonymity. For photographs that may reveal the identity of the patients, releases signed by the patient or their legal representative should be enclosed.

All submissions are screened by a similarity detection software (iThenticate by CrossCheck).

In the event of alleged or suspected research misconduct, e.g., plagiarism, citation manipulation, and data falsification/fabrication, the Editorial Board will follow and act in accordance with COPE guidelines.

Each individual listed as an author should fulfill the authorship criteria recommended by the International Committee of Medical Journal Editors

(ICMJE-[www.icmje.org](http://www.icmje.org)). The ICMJE recommends that authorship be based on the following 4 criteria:

- 1 Substantial contributions to the conception or design of the work; or the acquisition, analysis, or interpretation of data for the work; AND
- 2 Drafting the work or revising it critically for important intellectual content; AND
- 3 Final approval of the version to be published; AND
- 4 Agreement to be accountable for all aspects of the work in ensuring that questions related to the accuracy or integrity

# TURKISH JOURNAL OF UROLOGY

of any part of the work are appropriately investigated and resolved.

In addition to being accountable for the parts of the work he/she has done, an author should be able to identify which co-authors are responsible for specific other parts of the work. In addition, authors should have confidence in the integrity of the contributions of their co-authors.

All those designated as authors should meet all four criteria for authorship, and all who meet the four criteria should be identified as authors. Those who do not meet all four criteria should be acknowledged in the title page of the manuscript.

Turkish Journal of Urology requires corresponding authors to submit a signed and scanned version of the authorship contribution form (available for download through [www.turkishjournalofurology.com](http://www.turkishjournalofurology.com)) during the initial submission process in order to act appropriately on authorship rights and to prevent ghost or honorary authorship. If the editorial board suspects a case of "gift authorship," the submission will be rejected without further review. As part of the submission of the manuscript, the corresponding author should also send a short statement declaring that he/she accepts to undertake all the responsibility for authorship during the submission and review stages of the manuscript.

Turkish Journal of Urology requires and encourages the authors and the individuals involved in the evaluation process of submitted manuscripts to disclose any existing or potential conflicts of interests, including financial, consultant, and institutional, that might lead to potential bias or a conflict of interest. Any financial grants or other support received for a submitted study from individuals or institutions should be disclosed to the Editorial Board. To disclose a potential conflict of interest, the ICMJE Potential Conflict of Interest Disclosure Form should be filled in and submitted by all contributing authors. Cases of a potential conflict of interest of the editors, authors, or reviewers are resolved by the journal's Editorial Board within the scope of COPE and ICMJE guidelines.

The Editorial Board of the journal handles all appeal and complaint cases within the scope of COPE guidelines. In such cases, authors should get in direct contact with the editorial office regarding their appeals and complaints. When needed, an ombudsperson may be assigned to resolve cases that cannot

be resolved internally. The Editor in Chief is the final authority in the decision-making process for all appeals and complaints.

When submitting a manuscript to the Turkish Journal of Urology, authors accept to assign the copyright of their manuscript to the Turkish Association of Urology. If rejected for publication, the copyright of the manuscript will be assigned back to the authors. Turkish Journal of Urology requires each submission to be accompanied by a Copyright Transfer Form (available for download at [www.turkishjournalofurology.com](http://www.turkishjournalofurology.com)). When using previously published content, including figures, tables, or any other material in both print and electronic formats, authors must obtain permission from the copyright holder. Legal, financial and criminal liabilities in this regard belong to the author(s).

Statements or opinions expressed in the manuscripts published in Turkish Journal of Urology reflect the views of the author(s) and not the opinions of the editors, the editorial board, or the publisher; the editors, the editorial board, and the publisher disclaim any responsibility or liability for such materials. The final responsibility in regard to the published content rests with the authors.

## MANUSCRIPT PREPARATION

The manuscripts should be prepared in accordance with ICMJE-Recommendations for the Conduct, Reporting, Editing, and Publication of Scholarly Work in Medical Journals (updated in December 2017-<http://www.icmje.org/icmje-recommendations.pdf>). Authors are required to prepare manuscripts in accordance with the CONSORT guidelines for randomized research studies, STROBE guidelines for observational original research studies, STARD guidelines for studies on diagnostic accuracy, PRISMA guidelines for systematic reviews and meta-analysis, ARRIVE guidelines for experimental animal studies, and TREND guidelines for non-randomized public behavior.

Manuscripts can only be submitted through the journal's online manuscript submission and evaluation system, available at [www.turkishjournalofurology.com](http://www.turkishjournalofurology.com). Manuscripts submitted via any other medium will not be evaluated.

Manuscripts submitted to the journal will first go through a technical evaluation process where the editorial office staff will ensure that the manuscript has been prepared and submitted in accordance with the journal's guidelines. Submissions that do

# TURKISH JOURNAL OF UROLOGY

not conform to the journal's guidelines will be returned to the submitting author with technical correction requests.

#### Authors are required to submit the following:

- Copyright Transfer Form,
- Author Contributions Form, and
- ICMJE Potential Conflict of Interest Disclosure Form (should be filled in by all contributing authors)

during the initial submission. These forms are available for download at [www.turkishjournalofurology.com](http://www.turkishjournalofurology.com).

#### Preparation of the Manuscript

**Title page:** A separate title page should be submitted with all submissions and this page should include:

- The full title of the manuscript as well as a short title (running head) of no more than 50 characters,
- Name(s), affiliations, and highest academic degree(s) of the author(s),
- Grant information and detailed information on the other sources of support,
- Name, address, telephone (including the mobile phone number) and fax numbers, and email address of the corresponding author,
- Acknowledgment of the individuals who contributed to the preparation of the manuscript but who do not fulfill the authorship criteria.

**Abstract:** An abstract should be submitted with all submissions except for Letters to the Editor. Submitting a Turkish abstract is not compulsory for international authors. The abstract of Original Articles should be structured with subheadings (Objective, Material and methods, Results, and Conclusion). Please check Table 1 below for word count specifications.

**Keywords:** Each submission must be accompanied by a minimum of three to a maximum of six keywords for subject indexing at the end of the abstract. The keywords should be listed in full without abbreviations. The keywords should be selected from the National Library of Medicine, Medical Subject Headings database (<https://www.nlm.nih.gov/mesh/MBrowser.html>).

#### Manuscript Types

**Original Articles:** This is the most important type of article since it provides new information based on original research.

The main text of original articles should be structured with Introduction, Material and methods, Results, and Discussion subheadings. Please check Table 1 for the limitations for Original Articles.

Statistical analysis to support conclusions is usually necessary. Statistical analyses must be conducted in accordance with international statistical reporting standards (Altman DG, Gore SM, Gardner MJ, Pocock SJ. Statistical guidelines for contributors to medical journals. *Br Med J* 1983; 7; 1489-93). Information on statistical analyses should be provided with a separate subheading under the Materials and Methods section and the statistical software that was used during the process must be specified.

Units should be prepared in accordance with the International System of Units (SI).

**Editorial Comments:** Editorial comments aim to provide a brief critical commentary by reviewers with expertise or with high reputation in the topic of the research article published in the journal. Authors are selected and invited by the journal to provide such comments. Abstract, Keywords, and Tables, Figures, Images, and other media are not included.

**Review Articles:** Reviews prepared by authors who have extensive knowledge on a particular field and whose scientific background has been translated into a high volume of publications with a high citation potential are welcomed. These authors may even be invited by the journal. Reviews should describe, discuss, and evaluate the current level of knowledge of a topic in clinical practice and should guide future studies. The main text should contain Introduction, Clinical and Research Consequences, and Conclusion sections. Please check Table 1 for the limitations for Review Articles.

**Case Reports:** There is limited space for case reports in the journal and reports on rare cases or conditions that constitute challenges in diagnosis and treatment, those offering new therapies or revealing knowledge not included in the literature, and interesting and educative case reports are accepted for publication. The text should include Introduction, Case presentation, and Discussion subheadings. Please check Table 1 for the limitations for Case Reports.

**Letters to the Editor:** This type of manuscript discusses important parts, overlooked aspects, or lacking parts of a previously

# TURKISH JOURNAL OF UROLOGY

published article. Articles on subjects within the scope of the journal that might attract the readers' attention, particularly educative cases, may also be submitted in the form of a "Letter to the Editor." Readers can also present their comments on the published manuscripts in the form of a "Letter to the Editor." Abstract, Keywords, and Tables, Figures, Images, and other media should not be included. The text should be unstructured. The manuscript that is being commented on must be properly cited within this manuscript.

**Table. Limitations for each manuscript type**

Type of manuscript	Author Limit*	Word limit	Abstract word limit	Reference limit	Table limit	Figure limit
Original Article	6	3500	250 (Structured)	30	6	7 or total of 15 images
Review Article	2	5000	250	50	6	10 or total of 20 images
Case Report	4	1500	200	15	No tables	10 or total of 20 images
Letter to the Editor	4	500	No abstract	5	No tables	No media

\* If the number authors exceeds the limits, correspondent author should contact Editorial Office with a completed 'Authorship Contribution Letter'.

## Tables

Tables should be included in the main document, presented after the reference list, and they should be numbered consecutively in the order they are referred to within the main text. A descriptive title must be placed above the tables. Abbreviations used in the tables should be defined below the tables by footnotes (even if they are defined within the main text). Tables should be created using the "insert table" command of the word processing software and they should be arranged clearly to provide easy reading. Data presented in the tables should not be a repetition of the data presented within the main text but should be supporting the main text.

## Figures and Figure Legends

Figures, graphics, and photographs should be submitted as separate files (in TIFF or JPEG format) through the submission system. The files should not be embedded in a Word document or the main document. When there are figure subunits, the subunits should not be merged to form a single image. Each

subunit should be submitted separately through the submission system. Images should not be labeled (a, b, c, etc.) to indicate figure subunits. Thick and thin arrows, arrowheads, stars, asterisks, and similar marks can be used on the images to support figure legends. All information that may indicate an individual or institution should be omitted from the submitted images to ensure a blind evaluation process. The minimum resolution of each submitted figure should be 300 DPI. To prevent delays in the evaluation process, all submitted figures should be clear in resolution and large in size (minimum dimensions: 100 × 100 mm). Figure legends should be listed at the end of the main document.

All acronyms and abbreviations used in the manuscript should be defined at first use, both in the abstract and in the main text. The abbreviation should be provided in parentheses following the definition.

When a drug, product, hardware, or software program is mentioned within the main text, product information, including the name of the product, the producer of the product, and city and the country of the company (including the state if in USA), should be provided in parentheses in the following format: "Discovery St PET/CT scanner (General Electric, Milwaukee, WI, USA)"

All references, tables, and figures should be referred to within the main text, and they should be numbered consecutively in the order they are referred to within the main text.

Limitations, drawbacks, and the shortcomings of original articles should be mentioned in the Discussion section before the conclusion paragraph.

## References

While citing publications, preference should be given to the latest, most up-to-date publications. If an ahead-of-print publication is cited, the DOI number should be provided. Authors are responsible for the accuracy of references. References should be cited in brackets within the main text. Journal titles should be abbreviated in accordance with the journal abbreviations in Index Medicus/MEDLINE/PubMed. When there are six or fewer authors, all authors should be listed. If there are seven or more authors, the first six authors should be listed followed by "et al." In the main text of the manuscript, references should be cited

# TURKISH JOURNAL OF UROLOGY

using Arabic numbers in square brackets and superscript characters. The reference styles for different types of publications are presented in the following examples.

**Manuscripts Published in Electronic Format:** Morse SS. Factors in the emergence of infectious diseases. *Emerg Infect Dis* (serial online) 1995 Jan-Mar (cited 1996 June 5): 1(1): (24 screens). Available from: URL: [http:// www.cdc.gov/ncidod/EID/cid.htm](http://www.cdc.gov/ncidod/EID/cid.htm).

## REVISIONS

When submitting a revised version of a paper, the author must submit a detailed "Response to the reviewers" that states point by point how each issue raised by the reviewers has been covered and where it can be found (each reviewer's comment, followed by the author's reply and line numbers where the changes have been made) as well as an annotated copy of the main document. Revised manuscripts must be submitted within 30 days from the date of the decision letter. If the revised version of the manuscript is not submitted within the allocated time, the revision option may be canceled. If the submitting author(s) believe that additional time is required, they should request this extension before the initial 30-day period is over.

Accepted manuscripts are copy-edited for grammar, punctuation, and format. Once the publication process of a manuscript is completed, it is published online on the journal's webpage as an ahead-of-print publication before it is included in its scheduled issue. A PDF proof of the accepted manuscript is sent to the corresponding author and their publication approval is requested within 2 days of their receipt of the proof.

# TURKISH JOURNAL OF UROLOGY

## CONTENTS

### INVITED REVIEW

#### Urinary Tract Infections

- Candiduria; a review article with specific data from Iran 445  
*Maral Gharaghani, Simin Taghipour, Marzieh Halvaezadeh, Ali Zarei Mahmoudabadi*

### BRIEF REPORT

#### Urooncology

- Biparametric MRI and 41 sector map for MRI/Transrectal ultrasound fusion biopsy to increase diagnostic accuracy of prostate cancer 453  
*Michele Scialpi, Pietro Scialpi, Teresa Pusiol, Alfredo D'Andrea*

### ORIGINAL ARTICLES

#### Andrology

- The influence of metabolic profile of obese men on the severity of erectile dysfunction: are metabolically healthy obese individuals protected? 455  
*Adriana Moura, Inês Tomada, Nuno Tomada*

- Results of intracytoplasmic sperm injection performed with sperm retrieved by microscopic testicular sperm extraction in azoospermic patients 462  
*Erkan Erdem, Meriç Karacan, Ziya Çebi, Murat Uluğ, Ayşe Arvas, Teksen Çamlıbel*

#### Urooncology

- Patterns of management of translocation renal cell carcinoma 467  
*Ali Al-Daghmin, Sohaib Alhamss, Khloud Al-qasem, Hani Al-najjar, Khaled Al-smadi, Aseel Olaimat, Layana Al-halbounii*

#### Endourology

- Prediction of stone-free status after single-session retrograde intrarenal surgery for renal stones 473  
*Şenol Tonyalı, Mehmet Yılmaz, Mustafa Karaaslan, Cavit Ceylan, Levent Işıkay*

- Complications of percutaneous nephrostomy in a district general hospital 478  
*Rafal Turo, Seth Horsu, James Broome, Sanjay Das, Dev Mohan Gulur, Bo Pettersson, Gerard Doyle, Ninaad Awsare*

#### General Urology

- Effect of a two-day extensive continuing medical education course on participants' knowledge of clinical and operative urology 484  
*Syed Muhammad Nazim, Qamar Riaz, Muhammad Hammad Ather*

#### Female Urology

- Comparison of translabial ultrasonographic and urodynamic data of female patients with urinary incontinence: Importance of translabial ultrasonography in the diagnosis of incontinence 490  
*Serkan Akan, Halide Yüksel, Burcu Seher Anıl, Aytaç Şahin, Ahmet Ürkmez, Özgür Haki Yüksel, Ayhan Verit*

# TURKISH JOURNAL OF UROLOGY

## CONTENTS

### Pediatric Urology

- Delayed diagnosis of primary vesicoureteral reflux in children with recurrent urinary tract infections: Diagnostic approach and renal outcomes 498  
*Çağla Serpil Doğan, Nevin Semerci Koyun, Gülşah Kaya Aksoy, Bülent Çekiç, Murat Savaş, Elif Çomak*

### Transplantation

- Kidneys with small renal masses: Can they be utilized for kidney transplantation in the era of partial nephrectomy? 503  
*Emre Arpalı, Bilal Günaydın, Turgay Turan, Turhan Çaşkurlu, Asif Yıldırım, Burak Koçak*

### CASE REPORTS

#### General Urology

- Internal pudendal artery embolization: A minimally invasive approach for bulbar artery pseudoaneurysm 508  
*Hira Lal, Priyank Yadav, Vivek Singh, Vaishali Tomar*

#### Pediatric Urology

- A case of bilateral perinatal testicular torsion that presented with unilateral torsion; necessity of contralateral testis exploration 511  
*Hamid Pakmanesh, Mohsen Alinejad*

### LETTER TO THE EDITOR

- Fosfomycin as a promising alternative to treat urinary tract infection due to multidrug resistant uropathogens 515  
*Drisy Udayan, Sadia Khan, Unnimaya Pullanhi, Anil Kumar*

A PEER-REVIEWED BIMONTHLY JOURNAL

# TURKISH JOURNAL OF UROLOGY

EDITORIAL

Dear Colleagues,

Scientists present their painstakingly realized researches in a written format so as to share the results of their studies with their colleagues. The scientific journals play one of the most important roles in this sharing process. The manuscripts submitted to scientific journals pass through the critical reviews of the editorial board, and peer-reviewers, and then they are either accepted, sent to the authors for revision or rejected. During this process one of the most important stages that determine the fate of a manuscript is the peer review process. Hasty, and careless decisions about manuscripts submitted are not preferred. Besides, unnecessarily prolonged evaluation process is just a waste of time. Since most of the peer reviewers are selected among authors of various research studies, at this stage, their "empathizing with" the authors of manuscripts will be a rational approach. The following aphorism of Confucius concerning "empathy" complying with scientific, and universal rules of conduct should be always kept in one's mind: "Don't complain about the snow on your neighbor's roof when your own doorstep is unclean". As a family of *Turkish Journal of Urology*, we would like to thank to scientists who submit their manuscripts to our journal, and all of our supporters, sponsors, peer reviewers that devote their precious time and efforts to further improve scientific impact of *TJU*.

This last issue of the year contains invited review, original research articles, case reports, and letter to editor concerning urinary system infections, uro-oncology, andrology, endourology, female urology, pediatric urology, transplantation, and general urology. Our invited review in this issue is "Candiduria; a review article with specific data from Iran" written by Gharaghani et al. Urinary system infections are among the most frequently observed nosocomial infections seen with an increasing frequency in recent years. Candiduria is frequently observed especially in patients with urinary system infections having specific predisposing factors. In this review article the most recent developments in the treatment of candiduria that is regarded as an important problem for patients, laboratory workers, and physicians have been discussed. Another article which will capture your attention is a brief case report "Biparametric MRI and 41 sector map for MRI/Transrectal ultrasound fusion biopsy to increase diagnostic accuracy of prostate cancer" written by Scialpi et al. In this paper, it has been emphasized that biopsy guided by transrectal ultrasound fusion BpMRI, and 41 sector map may be an alternative to standard systematic 10-12 core-transrectal biopsy.

Submission of manuscripts to our journal means doubtlessly a magnificent support. We want to remind you again that referencing the articles published in *TJU* revives our journal. On behalf of our editorial board, I thank all researchers who made scientific contributions to our journal by sending their precious studies to us, and also all peer reviewers who are taking part in the evaluation of the publication process.

Respectively Yours,

Prof. Murat Bozlu  
Editor in Chief
