Aims, Scope, and Audience

Urology Research and Practice aims to publish studies of the highest scientific and clinical value and encourages the submission of high-quality research that advances the understanding and treatment of urological disease.

Urology Research and Practice covers a wide range of topics related to basic and translational science, education and simulation, endourology and stones, female urology and Pelvic Floor Reconstruction, urological infections, laparoscopy and robotics, andrology and infertility, prostatic diseases, reconstructive urology, oncology, and pediatric urology. The journal is interested in publishing original research that addresses important clinical questions and advances the understanding and treatment of these conditions. This may include studies on the effectiveness of different treatments, new diagnostic tools or techniques, and novel approaches to preventing or managing adult and pediatric urological conditions.

Urology Research and Practice publishes clinical and basic research articles, case reports, clinical and technical notes, systematic reviews and meta-analyses and letters to the editor. Conference proceedings may also be considered for publication.
