Turkish Journal of Urology is the scientific and official publication of the Turkish Association of Urology which is being published 4 issues per year; in March, June, September and December.

The aim of the Turkish Journal of Urology is to publish scientifically high-quality research articles. In addition, reviews, editorials, letters to the editor and case reports are also being accepted.

The Turkish Journal of Urology is an international journal, based on the independent and unbiased peer-review principles, that is being published both in Turkish and English. Articles are being reviewed according to the ‘double-blind’ review system, in which, both the advisors and the authors are blinded. Accepted manuscripts are edited by American Journal Experts.

The target group of the Turkish Journal of Urology is the urology specialists, medical specialty fellows and other specialists and practitioners who are interested in the science of urology.

“Editorial Board Guidelines” including Turkish Journal of Urology’s working system and principles is available on journal’s website.

Turkish Journal of Urology is indexed in Scopus, CINAHL, Gale/Cengage Learning, EBSCO, DOAJ, ProQuest, Index Copernicus and TUBITAK/ULAKBIM Turkish Medical Database.

Subscription
The annual subscription cost of the Turkish Journal of Urology is 50 Euros, and is being distributed free to the members of the Turkish Association of Urology. The full texts of all the articles are being issued online at www.turkishjournalofurology.com. Those who want to subscribe to the journal should apply to the Turkish Society of Urology.

Applications for permissions and advertisements should be made to the Editorial Office.

Informations for the Authors
Instructions for authors are available on the pages of the journal and in the following link: www.turkishjournalofurology.com

Responsibility of the Authors
All opinions and reports within the articles that are published in the Turkish Journal of Urology are the personal opinions of author(s), not the opinions of editors, editorial board or the publisher. The Turkish Association of Urology, editor, editorial board and the publisher do not accept any responsibility for the articles. Acid-free paper is being used in the Turkish Journal of Urology.
Turkish Journal of Urology is a peer-reviewed journal published by the Turkish Society of Urology. The Journal publishes original articles, case reports, reviews, editorial comments, letters to the editor, guidelines, visual urology (as DVD) and abstracts of materials presented at national urology meetings, pertaining to the field of urologic diseases. The journal is published four times a year.

Manuscripts can be submitted in Turkish or English. Manuscripts from Turkish authors should have sufficient competence in the English language, if not, the authors may be requested to re-send the manuscript written in Turkish.

Manuscripts should be prepared in accordance with The Uniform Requirements for Manuscripts Submitted to Biomedical Journals - International Committee of Medical Journal Editors, available at http://www.icmje.org. A manuscript will be considered only with the understanding that it is an original contribution that has not been published elsewhere. Before the peer-review process, all submissions are first reviewed by the editor. At the final stage of publication, a comprehensive copy-editing is undertaken for accuracy and clarity, after which galley proofs are sent to the authors for approval.

Authors are responsible for the content of the submitted material. All authors should sign a written consent indicating that they have seen and approved the final version of the manuscript. At the time galley proofs are sent, the authors are required to fill in a form covering authorship contributions, whether any conflict of interest issue exists, and transfer of copyright to the Journal.

Manuscripts reporting the results of experimental studies on human subjects must include a statement that the study protocol was approved by the ethics committee of the institution and informed consent of the subjects was obtained after the nature of the procedure(s) had been fully explained. The authors are strongly requested to send the approval of the ethics committee together with the manuscript. In addition, manuscripts on animal studies should describe procedures indicating the steps taken to eliminate pain and suffering. Authors are advised to comply with internationally accepted guidelines including the Helsinki Declaration, and guidelines for Good Clinical Practice and Good Laboratory Practice and state such compliance in their manuscripts.

Manuscripts should not exceed word limits set by the Journal (including abstract, material and methods, results, and discussion; excluding references, tables/figures, and legends), that is, 3000 words for original articles, 1500 words for case reports reports, and 5000 words for reviews. The maximum number of tables and figures (total) should be 6 regardless of type of manuscript. Abstracts should not exceed 250 words. Author(s), the title of the paper and subtitles should be in Times New Roman, bold, 12 pt. Body text should be in Times New Roman, 12 pt. Authorship should be based only on substantial contributions that meet the authorship criteria.

Manuscript submission
All manuscripts should be submitted via the on-line system of the Journal at http://www.journalagent.com/uroloji/. Instructions for submissions can be found at http://www.journalagent.com/uroloji/.

Manuscript preparation
Manuscripts should be typeset on a standard A4 page layout, with 2.5 cm (1 inch) margins on each side of the page, with double-line spacing and each page numbered consecutively.

Parts of the manuscript should be arranged in the following order: (i) The title is in English (and also Turkish for Turkish authors), (full names of the authors, institution address, telephone and fax numbers, and e-mail address will be submitted at steps 3, 4 and 5 of Journal Agent web-page, should NOT be written in main text);
(ii) English (and also Turkish for Turkish authors) abstracts; (iii) Introduction; (iv) Material and methods; (v) Results; (vi) Discussion; (vii) References. Any footnote concerning previous presentations or funding of the manuscript should be placed on the title page.

The body of the text can be appropriately subtitled. Case reports should be presented under the titles Introduction, Case report, and Discussion. To facilitate reading, reviews can be appropriately subtitled.

Abstracts: Abstracts should have the following structure: Objectives, Material and methods, Results, and Conclusion. Abstracts for case reports and reviews should be unstructured.

Keywords: Three to five keywords (in alphabetical order) can be submitted. Index Medicus Medical Subjects Headings (MeSH) can be used for this purpose (web page: http://www.ncbi.nlm.nih.gov/pubmed/).

Material and methods: This section should give information with adequate details on the institution the study was conducted, dates for the study period, patients’ characteristics, methods, and how patients were selected. A clear description of the statistical methods should also be given.

Results: This section should give findings in detail, supported by illustrations and tables. The authors should avoid repeating data in the text that are already presented in tables and illustrations.

Discussion: It should mainly rely on the conclusions derived from the results of the study, with appropriate citations from the most recent research. At the end of the Discussion, any contribution that is not related to authorship can be mentioned under the title Acknowledgements.

Use of abbreviations should be limited to the most standard ones.

Figures and tables: Illustrations and tables accompanying the text should be uploaded on-line. The format of illustration files can be JPEG or TIFF. Tables and figure legends should be double-spaced on separate pages. Both tables and illustrations should be numbered with arabic numerals in the order in which they appear in the text. Microscopic photographs should include information on staining and magnification. Full terms for abbreviations should be listed under tables and figures.

References: References should be numbered as superscript number in the order in which they are mentioned in the text (e.g. “... technique described by Burnett et al.[1]”). Unpublished data or personal communications should not be used. Direct use of references is strongly recommended and the author may be asked to provide full-text of cited references. Journal titles should be abbreviated according to the Index Medicus; otherwise, the full title of the journal should be given. All authors if six or fewer should be listed; otherwise, the first six and “et al.” should be written. The style and punctuation should follow the formats outlined below:

When necessary, manuscripts submitted will be edited and corrected by the Editorial Board without altering the original content. Reprints are not provided after the publication.
ORIGINAL ARTICLES

Urooncology
The effect of the presence of a high-grade tertiary Gleason pattern in radical prostatectomy specimens on histopathological results and biochemical failure
Mehmet Giray Sönmez, Ahmet Hakan Haliloğlu, Erhan Demirelli, Orhan Göğüş
Investigating the factors that affect the knowledge level regarding prostate cancer screenings
Cantürk Çapık

Endourology
The approach of urologists to kidney stones in southeastern Anatolia: a questionnaire survey
Sakıp Mehmet Erturhan, Ömer Bayrak, Necmettin Penbegül, İker Seçkiner, Haluk Söylemez, Ahmet Ali Sancaktar, Faruk Yaşıcı

Laparoscopy
Laparoscopic retroperitoneal pyelolithotomy and open pyelolithotomy: a comparative study
Asim Mushtaq Patloo, Arif Hussain Sarmast, Mehvish Afzal Khan, Muneer A. Khan, Muneer Zaz, Masarat Ashraf Khan, Hakim Irfan Showkat
Current laparoscopic practice patterns among urologists in Turkey

Andrology
Parkinson’s disease is a risk factor for late onset hypogonadism: a crosssectional, controlled study
Mustafa Aydin, Mustafa Kadihasanoğlu, Haydar Guler, Umut Sanoğullar, Gülay Kenangil, Cengiz Miroğlu, Muammer Kendirci
Is there any difference in severe erectile dysfunction detection when different diagnostic metabolic syndrome criteria are used?
Melih Balci, Yılmaz Aslan, Altuğ Tuncel, Mustafa Kayali, Ersin Köseoğlu, Ali Atan

General Urology
The relationship between sexual dysfunction and disease-related parameters and quality of life in patients with multiple sclerosis
Fatih Tarhan, Uğur Yücetaş, Ülkü Türk, Gökhan Faydacı
REVIEWS

CIS of the bladder: a review of literature
Ahmed Fouad Kotb, Mohamed Mohie Hashad, Ahmed Elabbady

Treatment options in benign prostate hyperplasia associated with lower urinary tract symptoms
Ali Atan, Altuğ Tuncel

CASE REPORTS

Two giant stones located in the penile and prostatic urethra: a case report and review of the literature
Deniz Bolat, Ismail Cenk Acar, Ömer Levent Tuncay

Foreign body remained in urethra for 12 years: a rare presentation of a common problem with a short review of the literature
Saurabh Sudhir Chipde, Manas Ranjan Pradhan, Abhishek Yadav, Rohit Kapoor, Rakesh Kapoor

Emphysematous pyelonephritis caused by Candida species: first case in the English literature
Ömer Bayrak, İlker Seçkiner, Ersan Bulut, Sakıp Mehmet Erturhan

Pure small cell carcinoma of the prostate: case report
Mustafa Kemal Atilla, Selçuk Şahin, Mustafa Bakırtaş, Baki Tarançık

An unusual cause of obstructive anuria: an encrusted forgotten DJ stent in a solitary kidney
Ahmet Ali Sancaktutar, Haluk Söylemez, Murat Atar, Necmettin Penbegül, Yaşar Bozkurt
Dear Colleagues,

In the busiest days of the academic calendar, we are glad to present you the latest issue of the Turkish Journal of Urology. After reorganization of the journal within the last one year, we are pleased to hear and further motivated by your positive feedback about formal and contextual changes that we made. Our common purpose is to raise the quality of our journal to the international standards.

The loss of motivation brought by the gray clouds circulating over our profession for a variety of reasons has also influenced the quantity and the quality of the manuscripts being sent to our journal. Our part is to support our younger colleagues more than ever and motivate them for scientific production. The glory of scientific production will overcome all issues. However, I would like to remind you of an important point that we expect your support by citing our journal in scientific manuscripts you send to other journals for publication.

We think that “Grand Urology Meeting”, which is planned to take place in October, next year, would be an important opportunity from a historical perspective on the road of cleaning Turkish Urology family from offence and pointless ambitions. With the occasion of this meeting, we hope to have a scientific celebration like we had in the past.

As the Editorial Board, we anticipate from the whole urology family to support our journal more than ever. Yet, the success coming after this support will belong to all of us.

Best Regards,

On Behalf of the Editorial Board of the Turkish Journal of Urology

Editor-in-Chief

M. Önder Yaman
Değerli Meslektaşlarınız,

Mesleğimizin üzerinde çeşitli nedenlerle dolaşan gri bulutların getirdiği motivasyon kaybı herkes gibi dergimize gönderilen yazı sayı ve kalitesini etkilemektedir. Bu noktada bizlere düşen özellikle genç arkadaşlarımızı her zamankinden daha fazla desteklemek ve bilimsel üretim için motive etmek. Bilimsel üretimin sonunda oluşacak mutluluk her türlü olumsuzluğu yenecektir. Bu noktada sizlere hatırlatmak istediğim bir önemli konu başka dergilere gönderilen bilimsel yazılınnızda dergimize atıfta bulunularak desteklenmesidir.

Önümüzdeki yıl ekim ayında yapılması planlanan “Büyük Üroloji Buluşması”nın Türk Üroloji ailesinin kişisel kırınıklıklardan ve kısır hırsıdan arınması yolunda tarihsel önemi olduğunu düşünmekteyiz. Bu toplantı vesilesiyle eski yıllarda olduğu gibi hep birlikte bir bilimsel şölen yaşayacağımızı umut ediyoruz.

Editörler Kurulu olarak tüm üroloji ailesinden beklentimiz dergimize her zamankinden daha fazla destek olmanızıdır. Zira bu destek sonrası oluşacak başarı hepimize ait olacaktır.

Saygılarımızla.
Türk Üroloji Dergisi Editörler Kurulu adına

Baş Editör
M. Önder YAMAN
